Summary

Backend-focused Software Engineer with hands-on experience building secure, scalable microservices and cloud-native workflows on AWS. Currently developing healthcare E-Billing services with FastAPI, AWS Lambda, and PostgreSQL. Previously designed a file service platform with RBAC and an asynchronous, malware-scanned file processing pipeline. Recognized as Achiever of the Month at Veersa Technologies.

Technical Skills

Languages: Python, JavaScript, Java, C

Backend & Frameworks: FastAPI, Node.js, Express.js, REST APIs, Microservices

Cloud & Infrastructure: AWS (Lambda, S3, SQS, DLQ, Pre-signed URLs, Multipart Uploads), MinIO

Security: RBAC (Permit.io), Malware Scanning (YARA, ClamAV)

Databases: PostgreSQL, MongoDB

Frontend: React, Redux, Tailwind CSS, Material UI, Bootstrap

Tools: Git, GitHub, Postman, Requestly, VS Code, IntelliJ IDEA

Core Concepts: Data Structures & Algorithms, OOP, Distributed Systems

Experience

Software Engineer – Veersa Technologies August 2026 – Present

E-Billing Platform (Healthcare)

- Develop backend services using **FastAPI, AWS Lambda, and PostgreSQL** to support payer, vendor, contract, and billing configuration workflows.
- Replaced manual database scripts with **reusable data-seeding workflows** that pre-populate common configuration fields and rules, reducing repetitive setup and manual errors.

Software Engineer Intern – Veersa Technologies June 2025 – July 2026

File Service Platform

- Built a **scalable microservices-based file service platform** with secure file storage, access workflows, and distributed file processing.
- Implemented **RBAC authentication and authorization using Permit.io** to enforce fine-grained access control across services.
- Designed an **AWS file processing pipeline** using **S3, pre-signed URLs, multipart uploads, SQS, and DLQ** for reliable asynchronous processing, with **YARA and ClamAV** for malware scanning. Implemented **chunk-based multipart uploads** that reduced large-file (1 GB) upload time by **roughly 70%**.

Projects

School Management System | *React, Redux, Tailwind, Node.js, Express.js, MongoDB* Oct 2024 – Jan 2025

- Built a **full-stack MERN application** with role-based dashboards for Admin, Teacher, Student, and Parent.
- Implemented form validation with **React Hook Form and Zod**; integrated **Cloudinary** for media uploads and **Gmail SMTP** for automated emails.

StudyNotion: EdTech Platform | *React, Redux, Node.js, Express.js, MongoDB* Nov 2023 – Jan 2024

- Built a **scalable EdTech platform** supporting course creation, student enrollment, and instructor dashboards.
- Implemented authentication and **role-based access control** for students and instructors.
- Designed backend APIs for course management, payments, and content delivery.

Education

ABES Engineering College Ghaziabad, UP

B.Tech in Computer Science (CGPA: 8.13) *November 2022 – June 2026*

Achievements

- **Achiever of the Month**, Veersa Technologies Jan 2026
  Recognized for backend contributions, including RBAC implementation and the AWS-based file processing pipeline.
- **LeetCode Rating: 1513 (Top 40%)** 2024
- **CodeChef Rating: 1114** 2025

Certifications

- **Java Programming Certificate**, University of Helsinki (Sep 2023)
- **Programming Essentials in Python**, Cisco Networking Academy (Dec 2023)
